

YOUNG FARMERS & RANCHERS

2022 High School Discussion Meet Questions

1. Due to current economic demands, many farmers and ranchers spend a lot of time outside the “fence rows” on off-farm jobs. How can Farm Bureau become more accessible and welcoming to members who are working in related fields and juggling responsibilities on and off the farm?
2. Climate has become a major topic among business leaders, policymakers and consumers. As an industry that depends on the weather, what role should we as farmers and ranchers play in shaping climate initiatives to benefit society overall as well as our own farms and ranches?
3. As the Voice of Agriculture, how can Farm Bureau be more inclusive of all agriculture and production practices? This includes, but is not limited to, women in agriculture, organic production, fresh produce, forestry and aquaculture.
